Muhammad Afzal Kalwar

Full-Stack Developer | Python Automation Engineer

Islamabad, Pakistan · Remote worldwide · Freelance / contract / hire

Services one-pager

I build production automation for real businesses: auto dialers, scrapers, email/CRM platforms, dispatch tools, and AI call workflows. 70+ public projects on GitHub.

01 Auto dialers & voice AI

Google Voice / iPECS dialers, AI call scripts, operator consoles, Windows outbound tools for dispatch & sales.

02 Scrapers & carrier data

Playwright/Selenium pipelines, FMCSA SAFER extractors, logistics lead systems, site capture/clone toolkits.

03 Email & CRM platforms

Bulk email verification, SMTP automation, lead CRMs, admin dashboards, outreach ops tooling.

04 Full-stack product builds

React/Next.js/Blazor frontends, Node/FastAPI/Go backends, Docker deploys, client websites & SaaS.

Best fit / engagement

Dialers · scrapers · email ops · CRM · dispatch/logistics sites · AI call workflows. Fixed-scope builds or weekly contract. Remote-first.

Flagship proof

google-voice-dispatch-agent · python-auto-dialer-pro · fiverr-lead-extractor-crm
